

CERIUM OXIDE BASED GLASS POLISHING COMPOUND

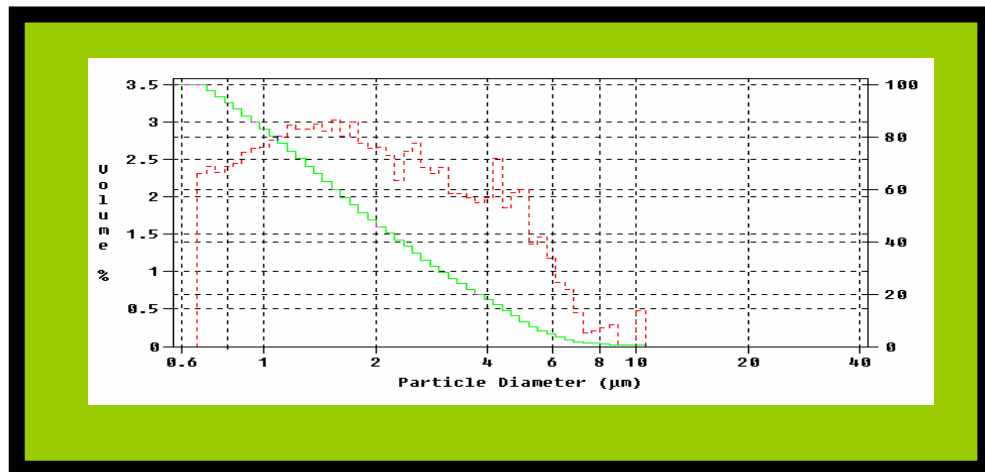

Typical Physical Properties

- **Appearance** White powder
- **pH**5.0 – 6.6
- **Particle Size(coulter)**
 D50 1.4 – 2.5µm
 D015µm max
- **Composition**
 Total Rare-Earth Oxide (%)..... 75 - 85
- **Suspension Treated**..... yes, soft settle

Applications

Flat Glass and Mirror Operations for High Performance Applications

- automatic beveling polish
- shape bevel polish
- wide bevels > 30 mm
- hi-speed operation > 5 m/min

Output: Coulter Multisizer

- **Packaging**20Kgs/carton 640 Kg/pallet
- **Cautions**Refer to Material Safety Data Sheet
