

ALUMINUM OXIDE POLISHING SLURRY

Typical Physical Properties

- **Appearance** white slurry
- **pH** 3.2 – 4.5
- **Particle Size(coulter)**
 - D₅₀ 1.2 – 2.2 μm
 - D₃..... 6 μm Max
- **Baumé**..... 22 - 25°
- **Suspension Treated**..... Yes

Applications

- ✓ High purity alumina oxide polish developed to rapidly polish CR39, high index and polycarbonate surfaces.
- ✓ Polibrite offers the maximum surface quality

Output: Coulter Multisizer

- **Packaging**(G) 4 gal/case; 144 gal/pallet
(P) 5 gal/pail; 24 pails/pallet
- **Cautions** Refer to Material Safety Data Sheet
